

# Features documentation

## Set Meal (Menu)

Here is the feature for creating **menus** or **bundles** for a business. You'll be able to create as many menus as you want.

Necessary components:

- **Menu name:** for example: "Evening menu", or "Family menu"
- **Price:** This field isn't mandatory, as you can enter the price in the menu description, but it's recommended.
- **Description:** you're going to use the text editor to create a menu. Look below to see how to create a beautiful menu.
- **Conditions:** This field isn't mandatory. You would be able to use it to specify some conditions, for example "only available on Mondays".

Here is what it looks like:

# Features documentation

EDITING

←

OK

Title \* :

Brunch

Price :

\$25

Description :

Source

**B** *I* U **S** *I<sub>x</sub>*                        

# Features documentation

These modifications won't be visible in the text editor nor in the app preview but will be well considered in the application.

Then, if you can, enter a picture for this menu and save all.

To enter a new menu, click on "+" and repeat the above process.

You can obtain this:

Your customers are now ready to order in your restaurant!
