Features documentation Set Meal (Menu)

Here is the feature for creating **menus** or **bundles** for a business. You'll be able to create as many menus as you want.

Necessary components:

- **Menu name:** for exemple: "Evening menu", or "Family menu"
- **Price:** This field isn't mandatory, as you can enter the price in the menu description, but it's recommanded.
- **Description:** you're going to use the text editor to create a menu. Look below to see how to create a beautiful menu.
- **Conditions:** This field isn't mandatory. You would be able to use it to specify some conditions, for example "only available on mondays".

Here is what it looks like:

1						Format	-		
on		in the text	editor's ı	menu, tł	nen click on			and choose	"title
1" or	"tit	le 2". Your	title will	be form	atted with th	ne Lobster	⁻ police	e (the same p	oolice
that i	s us	sed for the	discount	title in t	the Discount	feature).			

Press Enter. Enter your appetizers if the title is "appetizer", press Enter between each item.

To enter a new title ("dishes" for example if you've just entered the appetizers),

make a separation by pressing Enter and clicking on 🛄 in the text editor menu. Then press Enter and reproduce the previous process.

These modifications won't be visible in the text editor nor in the app preview but will be well considered in the application.

Then, if you can, enter a picture for this menu and save all.

To enter a new menu, click on "+" and repeat the above process.

You can obtain this:

Your customers are now ready to order in your restaurant!
