This feature allows you to create image galleries. You've got four options:

- Create a gallery from Picasa
- Create a gallery from Instagram
- Create a gallery with your own photos
- Create a gallery from Facebook

1. Create a gallery from Picasa

The **"name"** field allows you to give a name to your gallery. If you have several galleries, users will thus be able to choose the gallery they want to take a look at. With the **"search"** field you'll be able to retrieve all photos from Picasa that are relevant to this search.

And the result is:

You can also retrieve all photos from a specific Picasa album or Picasa account:

- Fill in the Search field with your Picasa account email.
- Select the album you want to add to your app (Your Picasa album must be public).
- You're done.

2. Create a gallery from Instagram
