

Features documentation

Images

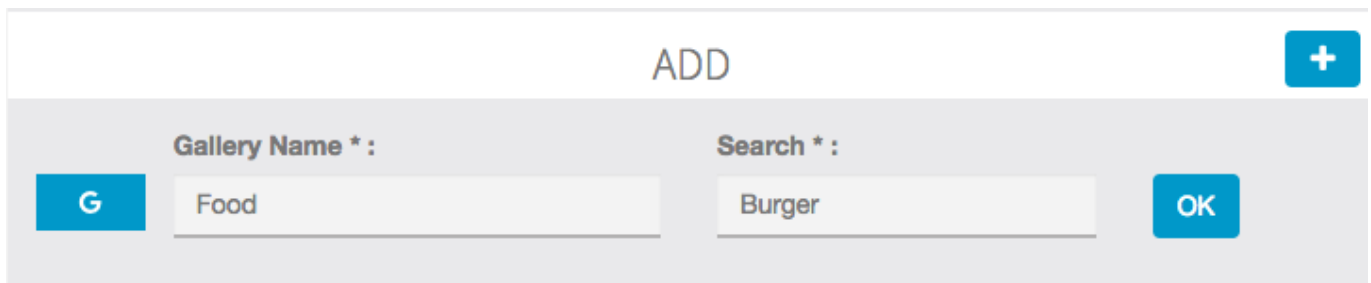

This feature allows you to create image galleries. You've got four options:

- **Create a gallery from Picasa**
- **Create a gallery from Instagram**
- **Create a gallery with your own photos**
- **Create a gallery from Facebook**

1. Create a gallery from Picasa

The **“name”** field allows you to give a name to your gallery. If you have several galleries, users will thus be able to choose the gallery they want to take a look at. With the **“search”** field you'll be able to retrieve all photos from Picasa that are relevant to this search.

A screenshot of a web form for creating a gallery. At the top, the word 'ADD' is centered, and a blue button with a white plus sign is on the right. Below this is a light gray section with two input fields. The first field is labeled 'Gallery Name * :', has a blue button with a white 'G' icon to its left, and contains the text 'Food'. The second field is labeled 'Search * :', contains the text 'Burger', and has a blue button with the text 'OK' to its right.

And the result is:

Features documentation

You can also retrieve all photos from a specific Picasa album or Picasa account:

- **Fill in the Search field with your Picasa account email.**
- **Select the album you want to add to your app (Your Picasa album must be public).**
- **You're done.**

2. Create a gallery from Instagram

Features documentation

Since Instagram has changed their API policies, now you must use your own Instagram keys in order to create an Instagram gallery. You will find how to create your Instagram API keys here.

FEATURE SETTINGS

	Page name: <input type="text" value="Images"/>	Activated <input type="checkbox"/>
---	--	--

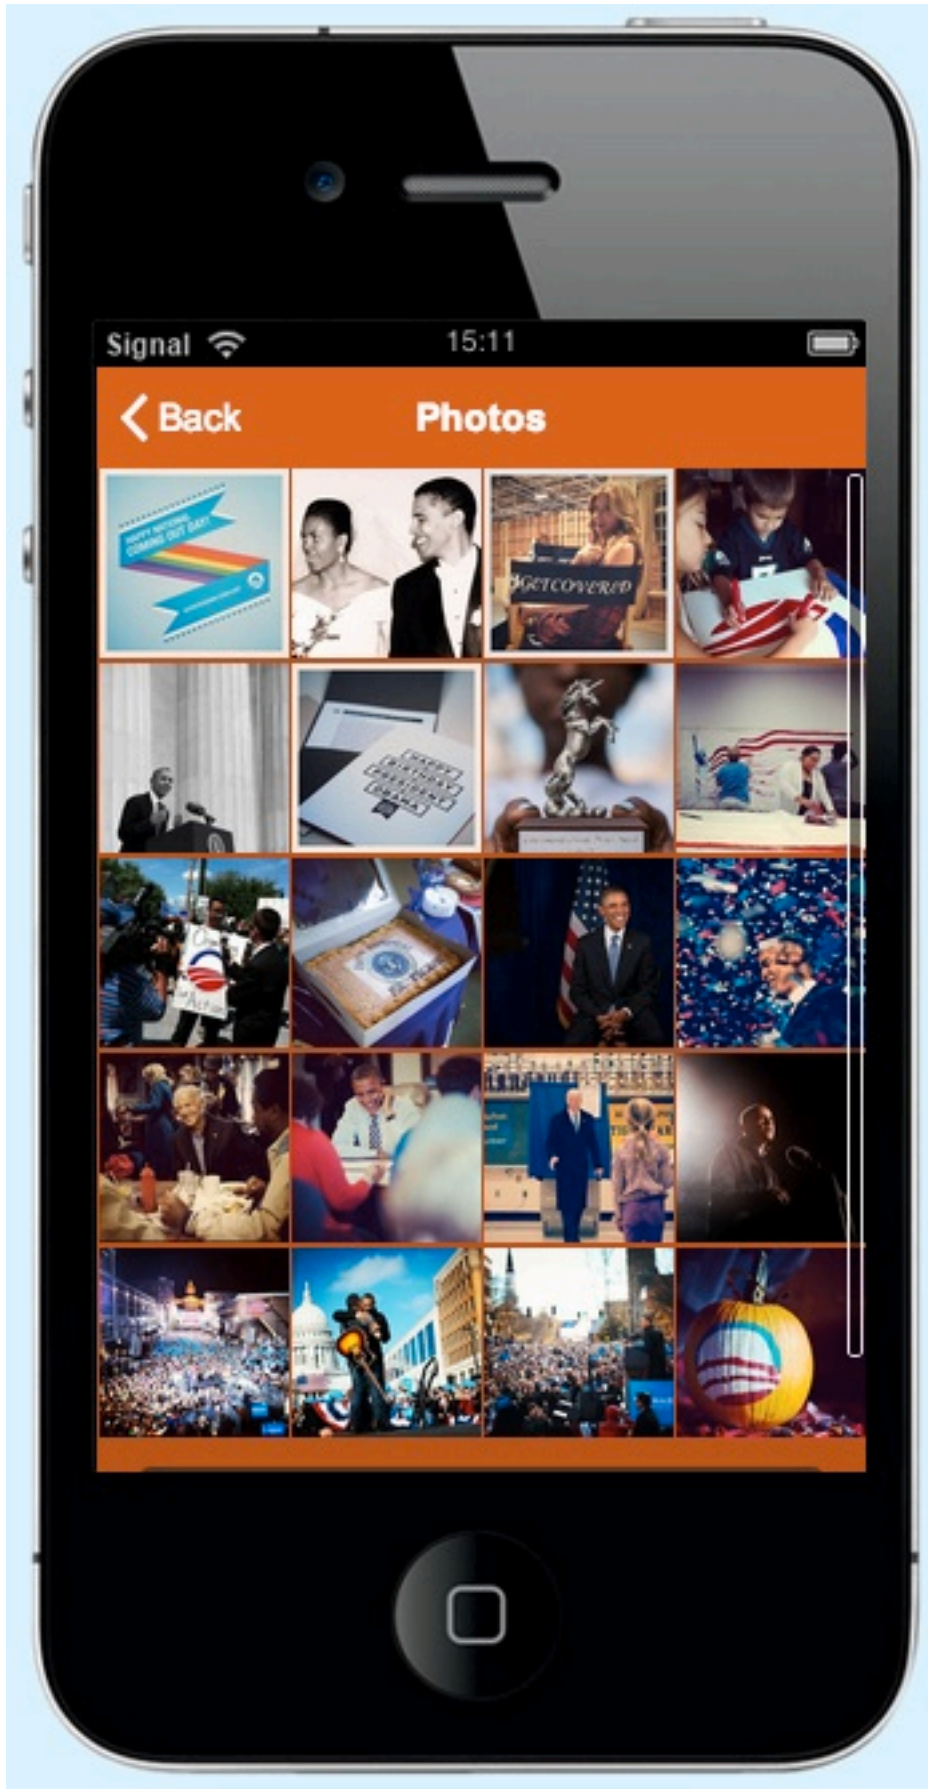

ADD

Gallery Name * : <input type="text" value="First Lady"/>	Search * : <input type="text" value="michelleobama"/>	<input type="button" value="OK"/>
--	---	-----------------------------------

And the result is:

Features documentation

3. Create from your own photos :

Name your gallery, and click on **“0 image”** to upload photos from your computer.

Features documentation

ADD +

Gallery Name * : Search * : OK

SEND YOUR PICTURES ×

Browse

Maximum size : 2000*2000 px - Allowed filetypes : jpg and png

 Title: Description: ×

You can upload several photos in the same time, just select from one folder all the photos you want to upload.

It's not mandatory, but you can enter a title and a description for all your photos. Click on **“Ok”** to save your gallery.

4. Create a gallery from Facebook:

Enter the Facebook ID of your Facebook page and choose which images you want to

show in the “Search” field .

To create a new gallery, click on + and repeat the above process.

You can also create a gallery from a Facebook Fan Page, just enter the Facebook Fan Page ID and do the same process.

ADD +

Facebook page ID * : Search * : OK

Features documentation

You're done!
