

Features documentation

Fan Wall

With the Fan Wall feature, users of your application will be able to post comments and/or photos and to discuss among themselves.

1. Add a Fan Wall

When you add the Fan Wall feature to your application, you can set the “Near me” settings. It will allow a user to display on the Fan Wall only comments/photos from users around him, in the radius you have determined.

NEAR ME SETTINGS

'Near me' radius (in km):

Save

2. Add messages

You can add messages directly from the Editor by clicking on “Add an item” and then type your text and/or upload an image.

Features documentation

The screenshot shows a mobile application interface for creating a new post. At the top, there is a blue header bar with a white back arrow and the text "Back" on the left, and "New post" on the right. Below the header, there is a large white text input area with the placeholder text "Your comment". To the right of the input area, there is a small icon of a pencil. Below the input area, there is a horizontal line. Underneath the line, there is a camera icon and the text "Add Image". At the bottom of the form, there is a light gray button with the text "Send". The top of the screen shows a status bar with signal strength, carrier name, Wi-Fi icon, 100% battery, and the time 09:06.

3. Display possibilities

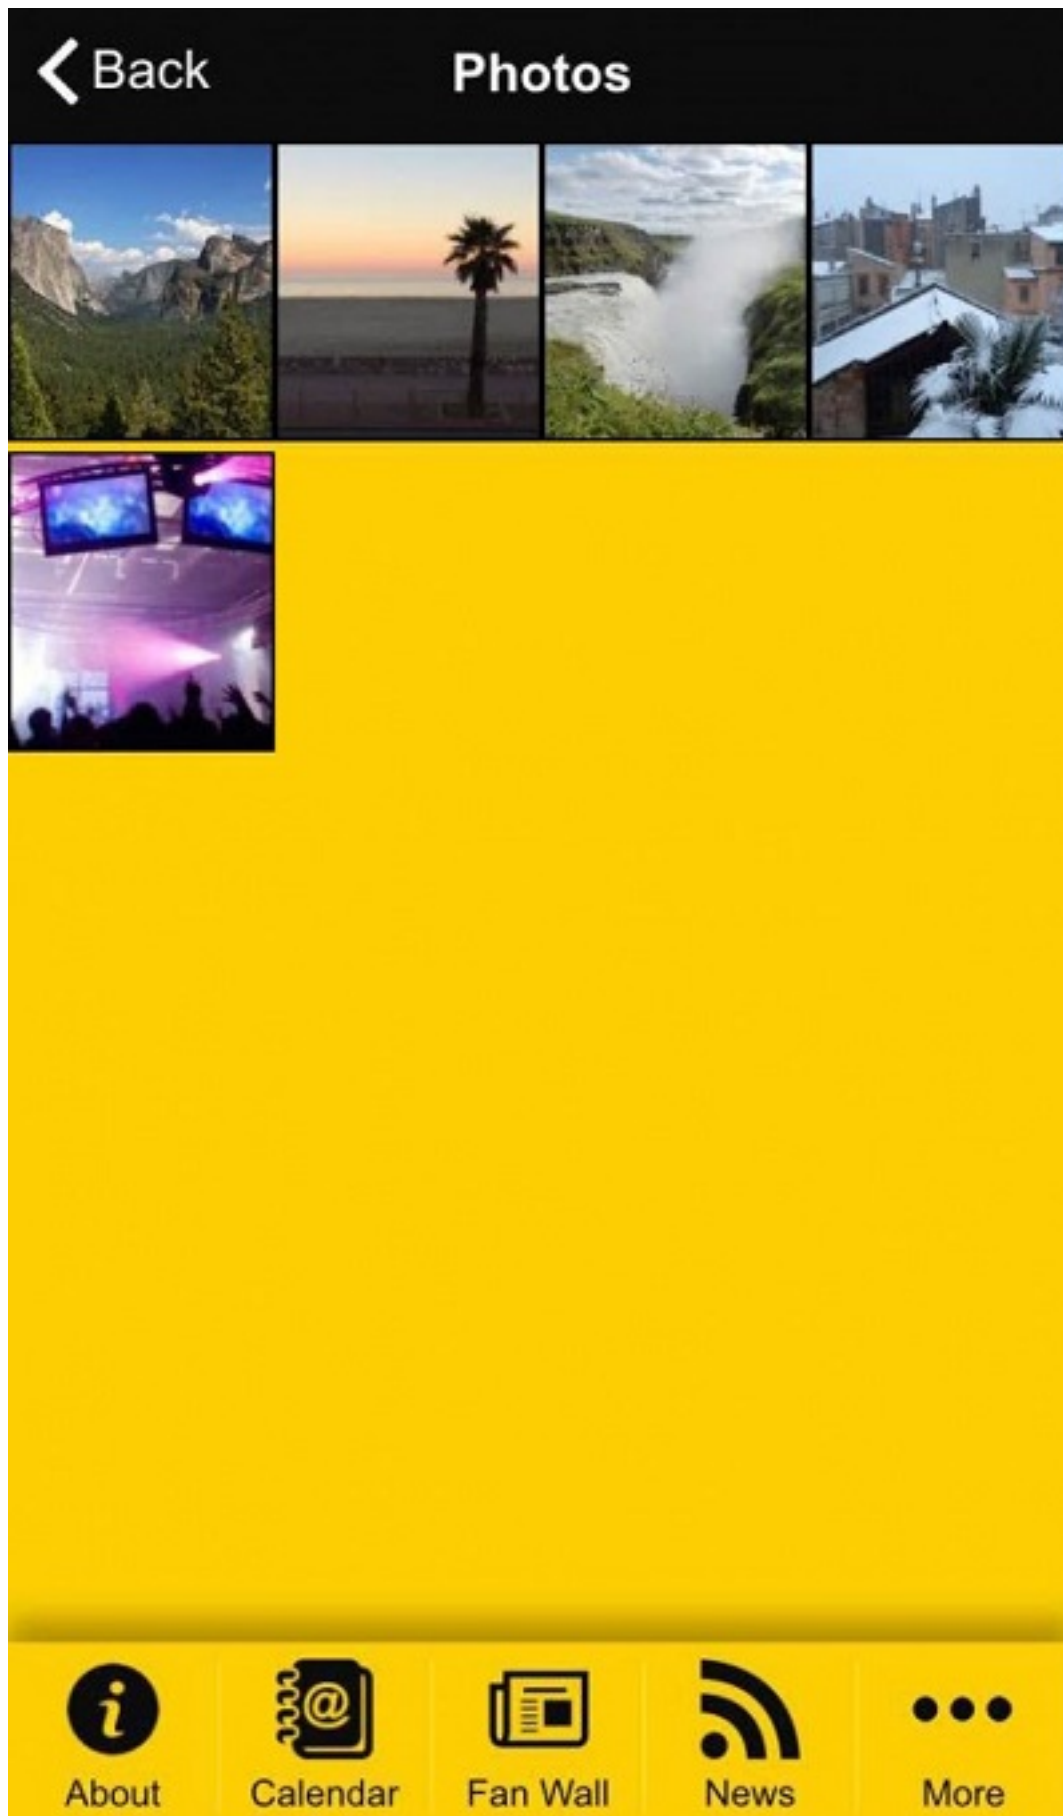

Let's see how it looks on the Fan Wall. You can choose "Near me" to display messages posted from a close position to you (determined by the "Near Me" radius), or "Recent" to display recent messages.

Features documentation

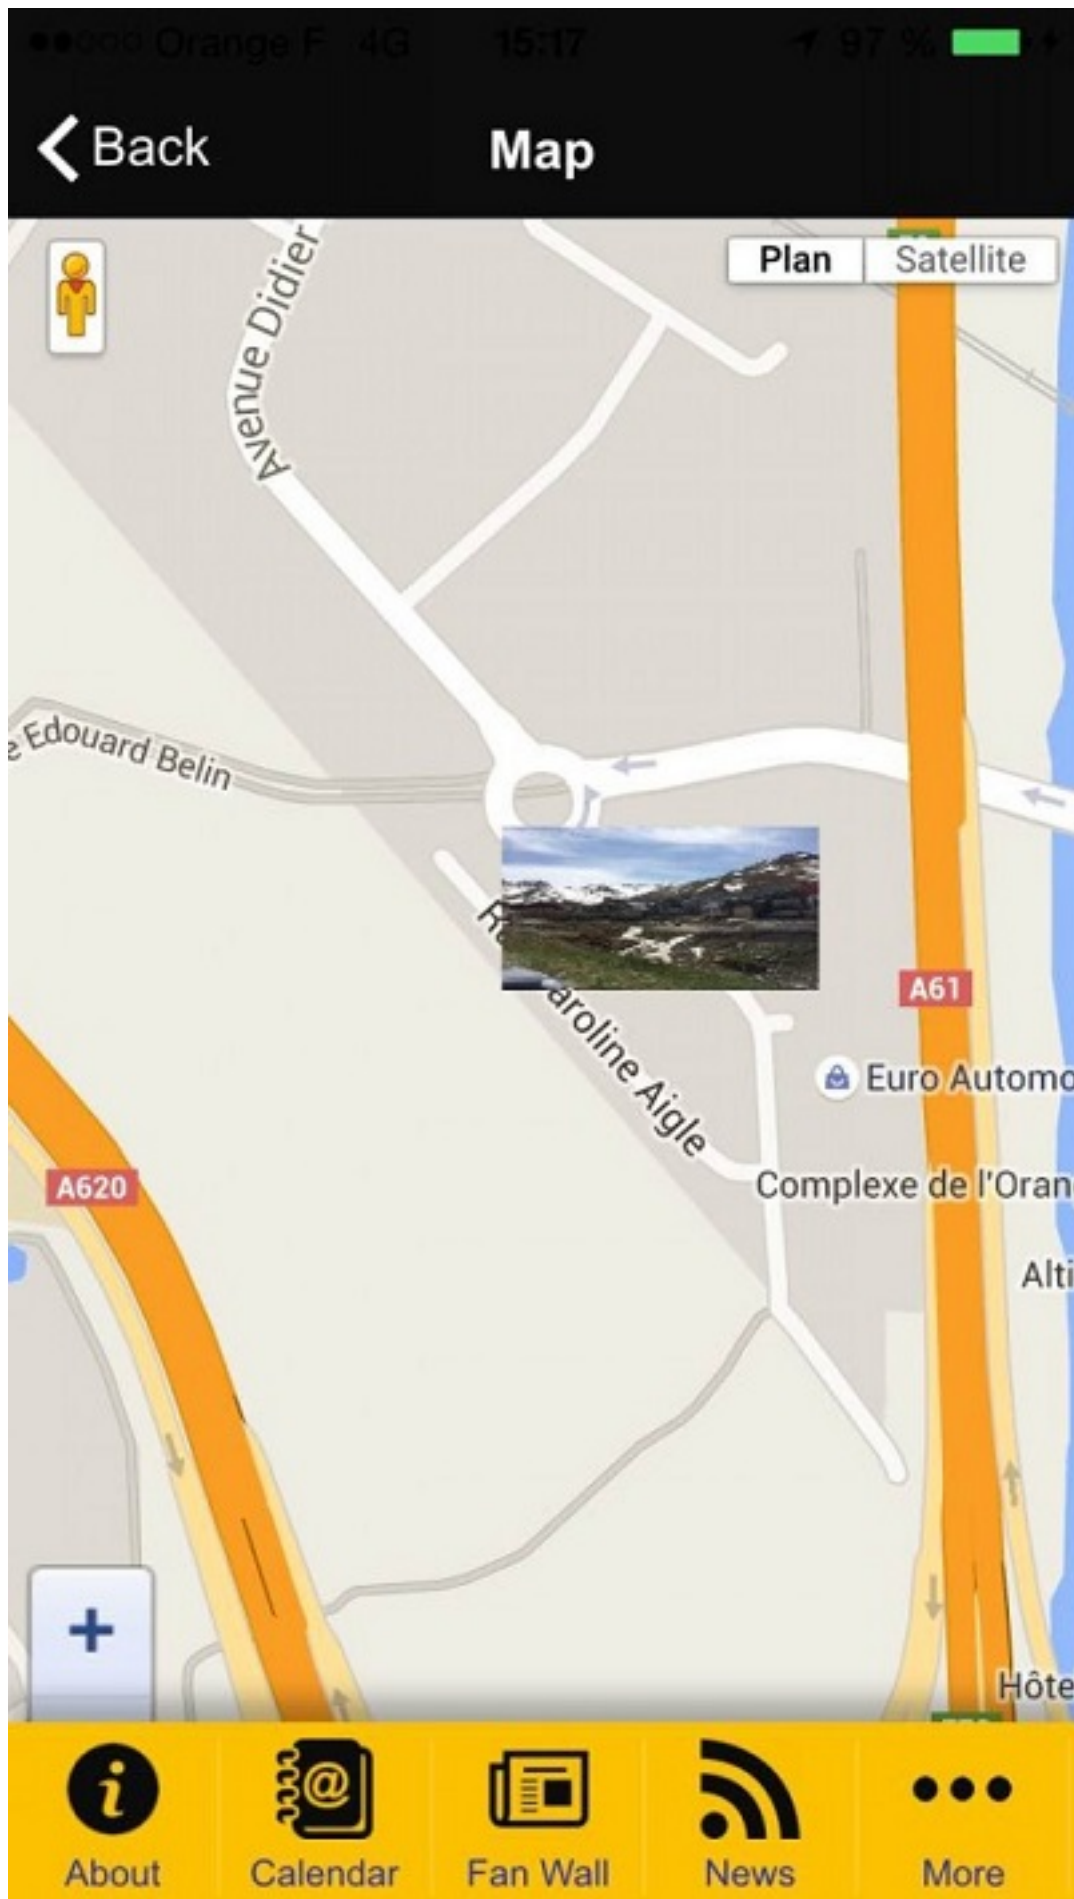

You can also click on “Photos” to display a gallery with all pictures that were uploaded to the Fan Wall.

Features documentation

And you can finally click on “Map” to display a map and to display the pictures geographical position.

Features documentation

Of course, the Fan Wall page allows your users to like and comment content that
