

# Features documentation

## Links

The Links page allows you to share information linked to your business with your clients.

For example, you can create pages like this one with this feature:

# Features documentation

# Features documentation

If you want to create a Links page, click on . It opens this window:

FEATURE SETTINGS

Page name:

Activated  
☒

YOUR LINKS

Insert a  
cover image

+ Add a link

First of all, you have to work on the content, then you can work on the design.

## 1. The content

To add a new link, click on “+ Add a link”. Then this appears:

Picto	Title *	Link *		
	<input type="text" value="Title"/>	<input type="text" value="Link"/>	<input type="button" value="OK"/>	<input type="button" value="x"/>

Now, you just have to write the name of your link in “Title” and the url address of the link in “link”. You can also add a logo to your link if you click on  “Picto”. You can create as many links as you want, you just have to do this process again.

## 2. Design

Insert a  
cover image

In order to make this page unique, you can insert a cover photo.

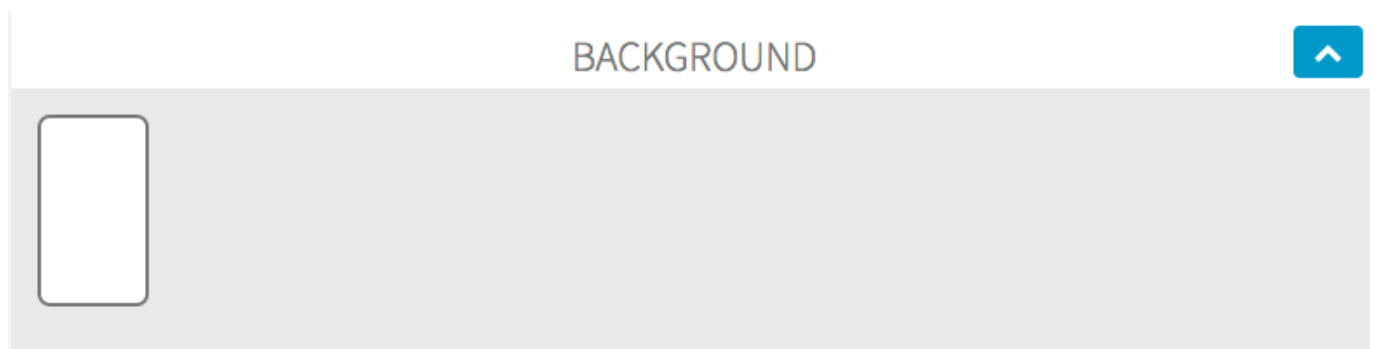

Then, you can change the background.

Page 3 / 4
