

Features documentation

Links

The Links page allows you to share information linked to your business with your clients.

For example, you can create pages like this one with this feature:

Features documentation

Features documentation

If you want to create a Links page, click on . It opens this window:

FEATURE SETTINGS

Page name: Activated

YOUR LINKS

[Insert a cover image](#)

[+ Add a link](#)

First of all, you have to work on the content, then you can work on the design.

1. The content

To add a new link, click on "+ Add a link". Then this appears:

Picto	Title *	Link *		
+	<input type="text" value="Title"/>	<input type="text" value="Link"/>	OK	×

Now, you just have to write the name of your link in "Title" and the url address of the link in "link". You can also add a logo to your link if you click on  "Picto".

You can create as many links as you want, you just have to do this process again.

2. Design

In order to make this page unique, you can insert a cover photo.

Then, you can change the background.

Features documentation

BACKGROUND

If you click on the background (here the blue rectangle) you can change it.
